## DETAILED ACTION

### *Drawings*

1. The drawings were received on 8/27/07. These drawings are approved.
2. Also, applicant indicated on page 9 of the 8/27/07 response that the second Figure 3 is deleted, but no indication of this was made in the drawing corrections. Hence, the examiner is enclosing an approved photocopy of the canceled Figure 3.
3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the sliding roof adjusting device and window lifting device (claim 7) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 3616

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no support in the specification for claim 7 (sliding roof adjusting device and window lifting device connected to the switching device) nor claim 8 (returning to the normal operating position after a predetermined time).

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Generally it is not clear how Figures 3a-3d and 4a-4d relate to Figures 1a-b (i.e., are these different embodiments? If not, how does, say, the invention change from

Figure 3a to Figure 3b without reconstructing the invention in midtravel?). Similarly, it is not clear how Figure 3a relates to Figure 3c, 3d, etc.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 3 and 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. In claim 3, line 5 there is no antecedent basis for "the first storage connection" (two storage connections were previously recited, but no stipulation was previously made in the claims of a first and second storage connection).

b. In claim 3, lines 5-6 there is no antecedent basis for "the second storage connection".

c. In claim 3, line 7 there is no antecedent basis for "the second input connection" (two input connections were previously recited in the claims, but no stipulation was made of a first and second input connection).

d. In claim 6, line 2 "that switching device" is unclear (apparently, "the" should be inserted before "switching").

e. Claim 7 is indefinite because the structure in that claim is not even discussed in the specification. Nor is it discussed in the specification how this is accomplished.

Art Unit: 3616

f. Similarly, claim 8 is indefinite because the structure is not discussed in the specification.

***Allowable Subject Matter***

9. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1<sup>st</sup> paragraph, set forth in this Office action.

10. Claims 2-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1<sup>st</sup> and 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3616

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
